

## OMV SmartPass

Your international toll solution with EETS-Technology across Europe!

With OMV SmartPass, we provide you with a smart toll solution utilizing EETS-Technology (European Electronic Toll Service) for heavy vehicles. OMV SmartPass simplifies the handling of various toll systems all across Europe, is linked to your OMV Card and replaces multiple toll boxes with only one single on-board-unit (OBU) to ease your toll payments and administrative burdens.

### Your benefits at a glance

- State-of-the-art EETS-Technology for electronic toll collection systems in Europe with 4G-capability
- One on-board-unit for multiple countries (see the countries covered on the map)
- Easy-to-use with mobile application (quick access to OBU status, activated countries and documents, easy change of vehicle settings)
- Automatic “over-the-air” updates of available countries without device replacement
- Transparent billing and invoicing via OMV Card
- Customer portal for Fleet Managers to consult OBU status, axles and weight status and changes history, active toll domains, and more
- Email notifications for Fleet Managers about key OBU events: axles and weight changes, entry into a tolling country, power disconnection, and more
- Constant service and country expansions
- Exchange rate of European Central Bank for conversion (if applicable)

### OMV SmartPass: 1 OBU for many countries
