Operations in Kazakhstan

In Kazakhstan, OMV holds, through its interest in OMV Petrom, development and production licenses for TOC oil fields (Tasbulat, Aktas and Turkmenoi) as well as for the oil field Komsomolokoe. All fields are located in the Mangistau region of West Kazakhstan near the Caspian Sea.

The licenses for the Komsomolokoe, Turkmenoi and Aktas fields are granted until 2028. The licence for the Tasbulat field is valid until 2023.

The four onshore fields cover a total area of 86.52 sq km, including approximately 60 wells, ~40 production facilities and 200 kilometers of pipelines.

In 2018, the average oil and gas production in Kazakhstan was 6.8 kboe/d (2017: 7.0 kboe/d).

Milestones

1998 Petrom acquired Tasbulat Oil Corporation (TOC)
2003 Petrom acquired 95% stake of Komsomolokoe exploration and production license
2004 Petrom privatization - OMV acquired 33.34% of Petrom share capital, which increased to 51% following a capital increase
2005 - 2006 Turkmenoi and Aktas fields brought on stream
2009 Komsomolokoe field brought on stream
2011 - 2012 Komsomolokoe and TOC fields redevelopment
2017 Licenses extension for Komsomolokoe, Turkmenoi and Aktas fields until 2028
2018 Petrom increased its interest in Kom Munai LLP to 100%
