Operations in Kazakhstan

In Kazakhstan, OMV holds, through its interest in OMV Petrom, development and production licenses for TOC oil fields (Tasbulat, Aktas and Turkmenoi) as well as for the oil field Komsomolskoe. All fields are located in the Mangistau region of West Kazakhstan near the Caspian Sea.

The licenses for the Komsomolskoe, Turkmenoi and Aktas fields are granted until 2028. The license for the Tasbulat field is valid until 2023.

The four onshore fields cover a total area of 86.52 km², including approximately 60 wells, approx. 40 production facilities and 200 km of pipelines.

In 2019, the average oil and gas production in Kazakhstan was 6.5 kboe/d (2018: 6.8 kboe/d).

Facts / Milestones

- 1998 Petrom acquired Tasbulat Oil Corporation (TOC)
