Forward looking statements may be identified by the use of terms such as “outlook”, “believe”, “expect”, “anticipate”, “intend”, “plan”, “target”, “objective”, “estimate”, “goal”, “may”, “will” and similar terms, or by their context. These forward looking statements are based on beliefs, estimates and assumptions currently held by and information currently available to OMV. By their nature, forward looking statements are subject to risks and uncertainties, both known and unknown, because they relate to events and depend on circumstances that will or may occur in the future and are outside the control of OMV. Consequently, the actual results may differ materially from those expressed or implied by the forward looking statements.

Therefore, recipients of this report are cautioned not to place undue reliance on these forward looking statements. Neither OMV nor any other person assumes responsibility for the accuracy and completeness of any of the forward looking statements contained in this presentation. OMV disclaims any obligation and does not intend to update these forward looking statements to reflect actual results, revised assumptions and expectations and future developments and events. This presentation does not contain any recommendation or invitation to buy or sell securities in OMV.
OMV Capital Market Story

- OMV at a glance
- Market and strategy
- 2015-2019 review: Active portfolio management towards returns and cash
- 2020: Acquisition of controlling interest in Borealis
- Financials, capital allocation priorities and management of current economic situation
OMV – The energy for a better life

Ready for a changing and volatile world

Safety first
- HSSE – Top priority
- Aim for ZERO harm – NO losses

Financial stability
- Integrated portfolio across the value chain
- Balanced regional footprint

Innovation & Technology
- Become a digital leader
- Provide solutions for future mobility
- Innovate towards circular economy

Carbon efficiency
- Targets to reduce carbon footprint
- Increase share of natural gas in portfolio
- Shift to petrochemicals

Employer of choice
- Attract top talents
- Promote diversity
One integrated company along the value chain

5 core regions: CEE, MEA, North Sea, Russia and Asia-Pacific

Production of 487 kboe/d with 3-years RRR of 166%

~60% gas production

Top European refiner with 17.8 mn t capacity
15% share in ADNOC Refining with 7.1 mn t at-equity capacity in Abu Dhabi

OMV to increase its stake in Borealis to 75% from 36%¹
OMV to become #1 in European ethylene and propylene capacity and #8 in global polymer capacity¹
~40% in Abu Dhabi based Borouge via Borealis¹

~2,100 retail sites in 10 countries across CEE
Secure commercial sales (e.g. Schwechat Airport and Borealis)

Natural gas sales volumes of 137 TWh in Europe
30 TWh gas storage capacities

¹ On March 12, OMV announced to acquire additional 39% share in Borealis for a purchase price of USD 4.68 bn, increasing its share to a controlling interest of 75%; the transaction is expected to close by end of 2020, subject to regulatory approvals
Why invest in OMV

- Prospective **project pipeline** in Upstream – focus on low-cost gas projects

- **Top European refiner and strong position in Abu Dhabi** – benefitting from demand growth in emerging markets thanks to internationalization of Downstream Oil

- **Announced extension of value chain to high-value products** – positioning for a low-carbon future

- Well positioned to become a technology leader in **circular economy** in recycling

- **Growth in operating cash generation**

- **Resilient cash flows** thank to integrated value chain also in times of low oil prices

- **Clear commitment to progressive dividend policy**
### Multi-billion action plan to safeguard financial strength in the current challenging environment

  - Financials, capital allocation priorities and management of current economic situation
Growing world population and improving living standards drive demand for oil and gas products

World primary energy demand
IEA World Energy Outlook 2019, bn toe

- Oil and gas will remain main sources of primary energy in the next decade
- Natural gas is an important building block for the world’s future energy supply in the two degrees scenario
- Improving living standards in emerging markets and increasing petchem demand support the demand for oil and gas

The Stated Policies Scenario incorporates today’s policy intentions and targets
The Sustainable Development Scenario maps out a way to meet the Paris Agreement
Petrochemicals markets with strong growth perspectives driven by economic growth and improving living standards

Polyolefins demand 2008 - 2028
Mt, CAGR

Fast growing market: CAGR ~4% until 2028, above GDP growth

Asia is the main driver of growth (CAGR ~5%)

Growth triggered by economic growth and improving living standards in emerging countries and steady growth in mature economies

While PE consumption per person is ~30 kg in developed countries, it is around 1 kg in developing countries

Market segments to drive the growth: packaging, automotive, building and construction and textile

1 Source: IHS Markit; polyolefins defined as polyethylene and polypropylene, excluding recycled volumes
OMV Strategy 2025 presented at the Capital Markets Day in March 2018 in a nutshell

Profitable growth

► Clean CCS Operating Result of ≥ EUR 5 bn in 2025
► ROACE target ≥ 12% mid- and long-term
► Cash flow from operating activities \(^1\) ≥ EUR 5 bn mid-term
► Long term gearing target (net debt/equity) of ≤30% excluding leases
► Progressive dividend policy

\(^1\) excluding net working capital effects

Expand integrated portfolio

► Leverage on proven concept of integration
► Significantly internationalize Upstream and Downstream
► Build strong gas market presence in Europe

Operational excellence

► Extend record of operational excellence
► Cost discipline
The move towards a low-carbon future is embedded in the OMV Strategy 2025

- We will increase the gas share in our Upstream portfolio to >65%
- We will shift oil products towards higher value and lower emissions products
- We will allocate EUR 500 mn to innovative energy solutions by 2025 (most importantly, ReOil® and Co-Processing)

More gas, less oil

More valuable products, burn less

Innovative technology
More gas – Strong pipeline of gas projects, driving OMV’s production towards the 600 kboe/d target

Production, production split
Kboed, %

- SapuraOMV
- SARB and Umm Lulu
- Achimov 4A/5A
- Neptun
- Nawara

Depending on the security situation in Libya and imposed production cuts by governments.

1 depending on the security situation in Libya and imposed production cuts by governments.

OMV Capital Market Story, July 2020
Extending the value chain towards more valuable products – Acquisition of a controlling interest in Borealis
Plastic to Oil – OMV’s proprietary ReOil® technology

- Converts used plastics under moderate pressure and normal refinery operating temperatures into synthetic crude oil
- Synthetic crude oil can be used as refinery feedstock to produce base materials or fuels
- Advantage of this synthetic crude oil is:
  - low content of heavy components
  - short transfer distance to refinery
- The substitution of crude oil by post-consumer plastics leads to:
  - ~45% lower CO₂ emissions
  - ~20% less energy demand per t

1 Austrian Federal Environmental Agency. 2016 – LCA well-to-refinery fence.
OMV is committed to the goals of the Paris Climate Change Agreement – New, more ambitious emissions targets for 2025

SCOPE 1 – target 2025 (vs. 2010)
Reduce the carbon intensity of operations¹ by

≥30% (previously 19%)

- ≥60% reduction in the Upstream carbon intensity
- ≥20% reduction in the Refining carbon intensity
- ≥1 Mio t CO₂ equivalent reduction in Group operated assets vs. 2020

Status year-end 2019
- Reduction of 22% vs. 2010

SCOPE 3 – target 2025 (vs. 2010)
Reduce the carbon intensity of product portfolio² by

≥6% (previously 4%)

- ≥60% share of low and zero carbon products in OMV portfolio
  - Increase share of natural gas
  - Increase volumes of petrochemicals
  - Increase biogenic or waste-based share in products

Status year-end 2019
- Reduction of 4% vs. 2010

¹ Direct emissions from operations that are majority-owned or controlled by the organization
² Emissions generated through the use of OMV products that are sold to third parties
OMV aims for net-zero Scope 1 emissions by 2050

- We will leave familiar paths to develop fundamentally innovative low-emission technologies

- We will push innovative approaches like carbon capture and storage/usage as well as hydrogen

- We will strive for strong partnerships as well as the right regulatory framework

- We will invest in climate friendly operations – for instance by improving efficiency and using renewable power sources for our own operations

- We will increasingly use recycled materials and will become a leading player in circular economy
OMV Capital Market Story

- OMV at a glance
- Market and strategy
- **2015-2019 review: Active portfolio management towards returns and cash**
- 2020: Acquisition of controlling interest in Borealis
- Financials, capital allocation priorities and management of current economic situation
Active portfolio management towards higher returns – Net acquisitions of EUR 3 bn

**Major divestments**
- Divested high cost and capex intensive **OMV UK**
- Sold minority stake in regulated **Gas Connect Austria**
- Decreased exposure to Turkey
- Streamlined portfolio and divested **non-core assets**

**Major acquisitions**
- Established **Russia as an Upstream core region**
- Established an **integrated value chain in the United Arab Emirates**
- Developed **Asia-Pacific** into an Upstream core region
- Invested in **future mobility and streamlined gas sales business**

**Total disposals since 2015 EUR bn** \(\Sigma3.1\)

**Total acquisitions since 2015 EUR bn** \(\Sigma6.0\)
- Thereof 2017: EUR 1.7 bn
- Thereof 2018: EUR 1.6 bn
- Thereof 2019: EUR 2.6 bn
Successful strategy execution in Upstream

- **Expanded footprint in New Zealand** by increasing stake in existing producing assets
- **Partnered with Sapura’s upstream business in Malaysia** – Platform for further regional growth, capitalizing on growing Asian markets and increasing LNG demand

- **Entered into attractive fields in UAE**
  - 20% stake in two producing oil fields Umm Lulu and SARB with reserves of 450 mn boe and long-term plateau
  - 5% interest in the Ghasha concession comprising three major gas and condensate development projects as well as other offshore oil, gas and condensate fields

- **Intended entry into Achimov 4A/5A in Russia**
  - 24.98% stake in Achimov 4A/5A phase development in the Urengoy gas and condensate field
  - 600 mn boe reserves and 12 years of plateau at ~80 kboe/d
  - Extension of the negotiation phase for the final transaction documents on a non-exclusive basis until June 2022
Upstream – Improved portfolio, lower cost

Internationalization of Downstream Oil – Benefitting from an integrated position in UAE

OMV’s integrated value chain in the United Arab Emirates enhances profitability, increases optionality and reduces volatility

**Upstream**

- **Sarb and Umm Lulu Ghasha**
  - OMV’s share: 20.0%
  - OMV’s share: 5.0%

  - Delivering high quality oil production growth
  - Maximizing value from substantial gas and condensate resources

**Refining & Trading**

- **ADNOC Refining Trading JV**
  - OMV’s share: 15.0%
  - OMV’s share: 15.0%

  - Operating the fourth largest refinery in the world
  - Increase in OMV refining and petchem capacity by 40% and 10%
  - Managing an integrated margin via Trading JV

**Petrochemicals/Polymers**

- **Borouge**
  - OMV’s share: 40.0%

  - Operating the largest polyolefin site in the world
  - Providing innovative, value creating plastics solutions

---

1. Entity to be established
2. Via Borealis: on March 12, OMV announced to acquire additional 39% share in Borealis for a purchase price of USD 4.68 bn, increasing its share to a controlling interest of 75%; the transaction is expected to close by end of 2020, subject to regulatory approvals.

OMV signs transformative agreement for increasing its share in Borealis to 75%

- OMV acquires additional 39% share in Borealis, increasing its share to a controlling interest of 75%
- Purchase price of USD 4.68 bn
  - Purchase price will be paid in two tranches, with USD 2.34 bn being due at closing, the remainder to be due no later than by the end of 2021
  - OMV is entitled to dividends distributed after 31 December 2019
- Expected to close by end of 2020, subject to regulatory approvals
- Company will be fully consolidated in OMV Group’s financials
- EPS accretive from first year onwards
CEO Rainer Seele:
“We will change our portfolio towards products that are demanded in a low-carbon world …

… and, we want to become a leading player in circular economy”
Borealis – Leading polymer producer with a focus on innovation

Note: Capacities include 40% Borouge capacities and 50% Baystar capacities.

1. Purchase of 50% share from NOVA Chemicals into Novealis Holdings has been completed in May 2020
2. Excluding Borealis net working capital changes; including dividends from Borouge
3. Including mtm plastics GmbH, Ecoplast GmbH and Rosier
Borealis – Technology leader with innovative solutions

**Innovative company**

- **6,900 patents granted** and 3,000 patents pending as of 2019

**Technology leader** in polymer production and recycling

- High share of specialty products

**Borstar®**

- Borstar® is a multi-modal proprietary technology that yields special properties and structural benefits

- PE and PP with good processability for demanding applications – broad molecular weight distribution with favourable mechanical properties

- Cost effective and smaller environmental footprint by accelerating converting processes

- Borstar® makes Borealis a partner of choice
Borealis – Strong profit contribution from specialties

Total Sales by segment, 2019

- Polyolefins: 17%
- Fertilizers & Others: 15%
- Base chemicals: 15%

Specialty products in Borealis margin, 2019

- Specialty products: ~60%
- At-equity pro-rata sales: 17%

- **OMV Capital Market Story, July 2020**

1 Purchase of 50% share from NOVA Chemicals into Novealis Holdings has been completed in May 2020
Borouge, the largest polyolefin site in the world – benefitting from competitive feedstock and access to Asian growth markets

- The world’s largest integrated polyolefins complex
  - JV between ADNOC (60%) and Borealis (40%) established in 1998, first operations started in 2001
  - Following the start up of Borouge 3 in 2015, capacity increased to 4.5 mn t
  - PP5 unit will increase capacity to 5.0 mn t and will be the tenth Borstar® unit in Ruwais
  - ~ 3,000 employees

- Combining competitive feedstock for the ethane based crackers and direct access to Asian growth markets via deep-water harbor

- Strong growth in earnings over the last decade – net profit reached a level of EUR 0.9 bn in 2019
Well positioned for growth in cost-advantaged locations

Europe

Belgium – new PDH plant in Kallo, located in proximity to port of Antwerp
► Cost advantaged feedstock: propane
► 750 kt p.a. PDH plant
► In execution; start-up 2022
► Investment EUR ~1 bn

Americas

Texas (US) – Baystar JV with Total
► 1,000 kt p.a. ethane cracker; in execution; start-up 2020
► 625 kt p.a. Borstar® PE plant; start-up 2021
► Investment (50%\(^2\)\(^3\)): USD ~2 bn, thereof USD ~0.7 bn paid

Middle East

Abu Dhabi – Borouge
► New Borstar® PP plant at Borouge 3 (PP5)
  ► Capacity: 480 kt p.a.
  ► Expected start-up in 2021
  ► Investments (40%): USD ~0.2 bn
► Borouge 4 (FEED)
  ► 1,800 kt p.a. cracker

\(^1\) Propane Dehydrogenated
\(^2\) Purchase of 50% share from NOVA Chemicals into Novealis Holdings has been completed in May 2020
\(^3\) Share in existing Baystar JV assets included
OMV to become #1 in ethylene and propylene capacity in Europe

Top ethylene & propylene capacities in Europe (Mn t)

- OMV: 2.0 (ethylene), 2.0 (propylene), 0.7 (FIDed expansion)
- DOW: 4.4
- Ineos: 3.9
- SABIC: 3.3
- LyondellBasell: 3.0
- BASF: 2.8
- Versalis: 2.7
- Shell: 1.2
- BP: 0.8

OMV’s global monomer capacity will increase by over 50% to 6.4 Mn t

- Thereof European ethylene and propylene: 4.0 Mn t
- Thereof aromatics and butadiene: 0.6 Mn t

PDH plant in Belgium will add further 0.75 Mn t of capacity in 2022, increasing OMV’s European ethylene and propylene capacity to 4.7 Mn t

Strong operational advantages from forward integration – in 2019, OMV sold 80% of its monomers in Western Europe to Borealis
OMV extends value chain into polymers, immediately becoming one of the world’s leading producers

Extension of value chain provides a natural hedge against cyclicality

Integrated value chain allows margin optimization

OMV gains access to high growth segment of polymers

OMV to become #8 globally and #2 in Europe

Top 10 polyolefins capacities **Globally**, 2018

Mn t

Globally, 2018

- Polyethylene
- Polypropylene
OMV aims to become a significant player in circular economy

Total investments of up to EUR 1 bn for innovative sustainable solutions planned until 2025

Waste collection
- Co-founder of the project STOP
- Support to create a sustainable waste management system
- Reduce ocean plastic pollution in emerging countries

Design for recycling & mechanical recycling
- Technology leader within the industry
- Design for recycling – solutions to replace difficult-to-recycle materials with 100% recyclable ones
- 2 recycling plants in Austria and Germany

Chemical recycling
- ReOil® – patented technology, converting of plastic waste into high-quality synthetic crude
- Substantially lower CO₂ emissions
- Successful operation of pilot plant
- Target: Upscaling to commercial plant of 200 kt/a by 2025

Running business

OMV Capital Market Story, July 2020
OMV stand alone perspective – Focus on disciplined organic investments

Organic CAPEX
EUR bn

- 2013-2015: 3.1
- 2016-2018: 1.8
- 2019: 2.3
- 2020 guidance: ~1.7
- 2020-2025: 2.0 - 2.5

- CAPEX planning for 2020 reduced by around 30% from EUR 2.4 bn to around EUR 1.7 bn in 2020 to cope with current economic situation (among further measures, see slide 44)
- The guided level of EUR 2.0 to 2.5 bn per year until 2025 sufficient to maintain our new portfolio and finance our growth projects.
Borealis – Cash outflows related to growth mostly in 2020/21

<table>
<thead>
<tr>
<th>Borealis organic Capex excluding leases and excluding Baystar JV EUR bn</th>
</tr>
</thead>
<tbody>
<tr>
<td>Past five years average</td>

</tr>
</tbody>
</table>

- **Borealis Organic Capex**
  - Running business capex to remain below EUR 500 mn
  - Growth capex in 2020/21 mainly driven by PDH plant
- **Acquisition of additional 50% in Novealis Holding** and funding of Baystar JV growth projects expected in 2020 and 2021 (~USD 1.3 bn)
- Growth capex in Borouge expected to be self funded
- Borealis launched a Resilience Program with focus on **reduction of cost and investments** to counter the current economic situation

1 Acquisition of additional 50% in Novealis Holding has been completed in May 2020
Stringent cost discipline

OPEX savings
In EUR mn

- Operational efficiency in both Upstream and Downstream
- Process optimization and harmonization
- Capture economies of scale and strictly manage overhead costs
- Leverage digitalization and optimize IT processes
- Procurement savings and contractor renegotiations

1. Efficiency program 2015-2017
2. Efficiency program 2018-2020
3. Response to challenging environment in 2020
OMV has a healthy balance sheet despite major acquisitions and record dividends

Net debt excluding leases & gearing (net debt/equity) excluding leases
EUR bn, %

- **Long-term gearing target** (net debt/equity) of ≤30% excluding leases
- Q1/19 – closing of the acquisition of a **50% stake in SapuraOMV Upstream** for USD 540 mn
- Q3/19 – closing of the acquisition of **15% in ADNOC Refining** for a purchase price of USD 2.43 bn
Balanced maturity profile and strong liquidity position

Maturity profile
EUR bn

End of June 2020 OMV cash-position
EUR 5.8 bn

In April and June 2020 issued senior bonds, in particular for financing the Borealis deal ¹
EUR 3.25 bn

End of June 2020 OMV undrawn committed credit facilities excl. acquisition facility
EUR 3.2 bn

Remaining OMV committed acquisition facility for the Borealis deal ²
EUR 0.75 bn

¹ Composed of: EUR 0.5 bn at a coupon of 1.500% due April 2024; EUR 0.5 bn at a coupon of 2.000% due April 2028; EUR 0.75 bn at a coupon of 2.375% due April 2032; EUR 0.75 bn at a coupon of 0.000% due June 2023; EUR 0.75 bn at a coupon of 0.750% due June 2030

² The committed facility for the acquisition of a controlling interest in Borealis amounted to EUR 4 bn at signing, of which EUR 3.25 bn have been successfully refinanced with senior bond issues in April and June 2020
## Multi-billion action plan to safeguard financial strength

- **Progressive dividend policy**: OMV aims to increase the dividend or at least maintain it at the respective previous year’s level.
- On July 28, the OMV Executive Board decided to adjust its dividend proposal to EUR 1.75 per share (from EUR 2.00) for the financial year 2019, due to the exceptionally difficult market environment.
- OMV will therefore propose to the Annual General Meeting on September 29, 2020 a payment of a dividend at the prior-year level, in line with the reconfirmed progressive dividend policy.

3 Retail and petrochemical sales
Downstream Oil Europe – Favorable yield structure

European integrated refinery yield
2019, %

- 13% LPG, naphtha (petrochemicals feedstock)
- 17% Gasoline
- 50% Middle distillates
- 2% Heavy fuel oil
- 6% Bitumen, coke, other residue
- 3% Others
- 9% Fuel & Losses

Heavy fuel oil yield (%)
OMV vs European refineries
2019

OMV
European refineries

Source: 2018 Woodmac study - 84 European refineries
Downstream Oil Europe – Strong profit contribution

Profitability turnaround in last 6 years
Operating Result per filling station, EUR 1,000

- Maintain retail profitability in a declining market
- Grow non-oil business as key differentiator to attract customers
- Further optimize cost efficiencies

Highly efficient retail stations
Average throughput per station, mn liters

- Increase sales volumes
  - Average throughput per station above country market averages
  - Increase market share in Austria and expand to South German, Hungarian and Slovenian discount retail market

1 Excluding OMV Petrol Ofisi
ADNOC Refining – Key facts

► Refining capacity of 922 kbbl/d:
  ► Ruwais Refinery East: 420 kbbl/d
  ► Ruwais Refinery West: 417 kbbl/d
  ► Abu Dhabi Refinery: 85 kbbl/d
  ► Petrochemical production: 1.7 mn t p.a.

► Associated infrastructure:
  ► Advanced logistics networks, utility assets and waste handling facilities
  ► Act as enablers of the Ruwais mega-site and provide predictable income

► 95% white products, near zero heavy fuel oil, excellently positioned for IMO 2020

1 with the Carbon Black and Delayed Coker and the Reside Fluid Catalytic Cracking Unit online
ADNOC Refining – Platform for further profitable growth

### SELF-FUNDED GROWTH

#### Operational excellence
- Maximize throughput and optimize existing operations
- Further increase profitability by utilizing waste heat energy

#### Increase feedstock flexibility
- Significantly expand crude slate, allowing for processing of heavier, more sour crude
- Capture value differentials

#### Integrate in petchem value chain
- Upgrade naphtha streams:
  - Paraxylene (1.5 mn t p.a.)
  - Benzene (0.2 mn t p.a.)
  - Gasoline (4 mn t p.a.)

#### Profitable long-term growth pipeline
- Detailed feasibility studies for future projects ongoing (e.g., new refinery)
- Focus on profitable downstream growth and integration
- Potential further integration into chemicals

### Final Investment Decision taken

| ADNOC Refining gross CAPEX ¹ planned: USD ~1.9 bn p.a. in 5 year business plan at announcement |

¹ OMV to consolidate ADNOC Refining at-equity, ADNOC Refining CAPEX will not be reported in OMV’s CAPEX

---

66 | OMV Capital Market Story, July 2020
Corporate Governance – Clear performance criteria attached to bonus plans 2019

Key elements Long Term Incentive Plan

- Focus on long-term value generation
- **Option to reduce payout significantly through HSSE malus** (e.g. in case of fatalities, incidents with highly negative environmental impact, etc.)
- Cap of payout in cash as well as total annual payout
- Shareholding requirement as % of annual gross base salary (2018: % fulfillment)
  - CEO: 200% (2018: 77%)
  - Deputy: 175% (2018: 61%)
  - Other Board Members: 150% (Florey 2018: 31%)
- **Clawback** rules in place

Key elements Annual Bonus

- Both financial and operational performance criteria
- +/- **20% Sustainability Multiplier at SB discretion**, main factors include:
  - Performance vs. last year
  - Reserve Replacement Rate (3yr average)
  - Extraordinary events
  - HSSE performance including fatalities, Lost Time Injury Rate and environmental impact
- **Clawback rules in place for the equity deferral part**

---

1 Applicable as of 2020
2 Free cash flow before dividends and excluding divestments and acquisitions
3 The stated shareholding requirement results from the LTIP 2016, when Mr. Pleininger still had an obligation of 150% of his gross annual salary; since his appointment as Deputy CEO, a shareholding requirement of 175% applies.
The energy for a better life.
